Airlin Singewald, County Project Manager
County Board of Supervisors
County Government Center
Board of Supervisors Chambers
1055 Monterey Street, Room D170
San Luis Obispo, CA 93408

Dear Airlin and SLO County Board of Supervisors,

This letter pertains to the proposed Verizon Wireless Minor Use Permit/Coastal Development Permit referral package for construction of an unmanned wireless communications facility with pole addition and associated cabinets and equipment in a residential single family neighborhood. Case number: DRC2015-0001. County Planner: Airlin Singewald.

The home-owners near by the proposed small cell tower/booster at Dorset Street and Whitehall, Cambria have strong safety and well-being concerns about the proposed project. I/we would like to request a hearing on this matter.

The coverage maps provided the Land Use Committee were not clear as to expected cell coverage from the small cell tower/booster. The neighbors of Park Hill would like propagation maps that clearly indicate existing and future cell phone coverage. A detailed list and location of customer complaints and dropped calls on Park Hill, Cambria needs to be provided to justify the proposed booster. In addition, Cambria residents should be informed of the master plan analyzing the current and future cell installations of Verizon and other carriers to be installed in residential neighborhoods.

The North Coast Advisory Council on August 19, 2015, by a unanimous vote, recommended the proposed cell booster be moved out of the encroachment and vehicle sight line. The neighbors suggested moving the location to Hastings and Whitehall.

Sincerely Yours,

Claudia Harmon Worthen, former NCAC Chair
